

INFO SHEET

BIO-HAZARDOUS/ TRAUMA SCENE CLEAN UP

TRAUMA SCENE SPECIALISTS

Alliance Environmental has Trauma Scene and Bio-Hazardous Technicians who are trained and certified to handle the physical and legal project requirements associated with the decontamination and cleanup of trauma scenes, blood borne pathogens, and biohazardous waste.

We maintain a 24/7 emergency response team to handle crime scene cleanups. We work with law enforcement in evaluating hazards, as well as cleaning up and removing blood, body tissue, and other hazardous materials. Our technicians fully adhere to state and federal regulations in the transportation and proper disposal of hazardous materials to properly approved EPA landfills and/or facilities.

We work to get residential, vehicle, commercial and industrial environments back to their original condition quickly, safely, and effectively. Alliance is the trusted provider for:

- ✓ **local and state police**
- ✓ **insurance companies**
- ✓ **government agencies**
- ✓ **apartment/property management companies**
- ✓ **hospitals**
- ✓ **commercial facilities**
- ✓ **maritime facilities**

Our technicians are compliant with California Department of Public Health, OSHA, Department of Transportation Substance Control and other existing regulatory agencies as required. Alliance Environmental prides itself on remaining discreet, attentive and respectful to the underlying emotional realities of the situation.

METHAMPHETAMINE LAB CLEANUP

Meth labs present a hazardous cleanup mess that requires professional remediation. These illegal drug labs are laden with dangerous, toxic, and often unstable chemicals. Our technicians adhere to all local, state, and federal regulations leaving the site clean and ready to move forward to the next phase of the project.

HOARDING CLEANUP

Our team helps people return their home to a livable condition. As some hoarding situations can present a danger or hazard to personal health and safety, these projects often require a professional cleanup crew adept at properly disposing of harmful waste (trash, dead animals, mold, human/animal feces, etc.) and performing cleanup duties in a manner that is both discrete and non-judgmental.

24/7 SERVICE AVAILABLE:

- ✓ Homicide remediation
- ✓ Suicide and accidental or unattended death clean-up
- ✓ Cleaning and disinfecting
- ✓ Vehicle cleaning and decontamination
